About the artist

Dima Riva's work explores the tension between structure and intuition, combining raw texture with precise composition. Each piece investigates presence - not only as an artwork, but as a spatial experience. Influenced by the Japanese concept of Ma - the space between - her works exist in dialogue with light, scale, and architecture. Rather than simply occupying space, the paintings interact with their environment, shifting with the viewer's perception.

"My abstract works emerge from the moment - intuitive, multi-layered, and without repetition."

Dima Riva Art
Based in Oetz, Tyrol | Austria
